KAMAL

MERN Stack Developer

kamal0000027@gmail.com | +91 8059159927 | Panipat, Haryana, India | kamalpandey27 | Kamal_Portfolio

PROFILE

MERN Stack Developer with hands-on experience architecting and shipping full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Independently designed, built, and deployed 2 production applications (live on Vercel/Render) implementing JWT authentication, role-based access control, RESTful APIs, and third-party integrations (Cloudinary, Nodemailer). Completed 6 months of MERN Stack training, including deployment of applications on AWS. During internship, improved application response time by 20% by debugging and optimizing backend performance. Strong grasp of MVC architecture, REST API design, and version control workflows; seeking a full-time MERN Stack Developer role to build scalable, production-grade web solutions.

Key Highlights: 6-month MERN Stack training • 2 full-stack apps deployed to production • JWT + bcrypt secured authentication • 20% faster response time • RESTful API design (MVC)

SKILLS

Frontend: React.js, Redux Toolkit, Context API, React Router, Axios, HTML5, CSS3, TailwindCSS, JavaScript (ES6+), Responsive Design, State Management

Backend: Node.js, Express.js, REST API design, bcrypt, JWT Authentication, Middleware, MVC Architecture

Database: MongoDB, Mongoose (schema design, aggregation), CRUD Operations, Database Schema Design

Deployment & Tools: Render, Vercel, Git, GitHub, Postman, VS Code, AWS, ChatGPT, Claude, Codex, Antigravity, Thunder Client

Other: Email Notifications (Nodemailer), Cloudinary, Role-Based Access Control, MVC Architecture

PROJECTS

Car Rental MERN App

July 2026 – Aug 2026

Live: https://car-rental-mern-app-vert.vercel.app/ | *GitHub:* https://github.com/KamalPandey27/car-rental-mern-app

- Architected a full-stack car rental platform (MERN, MVC architecture) covering vehicle listings, bookings, and an admin management dashboard
- Secured user sessions by implementing JWT authentication with bcrypt password hashing
- Engineered protected, role-based client-side routing with React Router to control feature access
- Centralized global application state with Redux Toolkit and Context API, eliminating prop-drilling and inconsistent UI states
- Designed and consumed RESTful APIs (Express.js, Mongoose) via Axios for seamless frontend-backend communication
- Deployed and configured production environments — frontend on Vercel, backend on Render — with environment-variable-based secrets management

Anand Laboratory Management System

Aug 2026 – Sept 2026

Live: https://diagnostic-lab-eight.vercel.app/ | *GitHub:* https://github.com/KamalPandey27/AnandLaboratory

- Built a laboratory management system (MERN, MVC architecture) to digitize patient records and test-report workflows, replacing manual record-keeping
- Implemented secure authentication (JWT + bcrypt) with role-based access control differentiating staff and admin permissions
- Modeled relational data with Mongoose schemas for patients, tests, and reports to keep data consistent and queryable
- Handled API communication with Axios and centralized state with Context API for predictable data flow
- Deployed frontend on Vercel and backend on Render, making the system publicly accessible for demo and evaluation

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern

Jan 2026 – July 2026

KNOWLEGIANT™ (powered by Zeenat & Company)

- Built reusable, modular React components adopted across multiple pages, cutting redundant frontend development effort
- Developed and tested RESTful APIs with Node.js and Express, integrated with MongoDB for reliable data management
- Improved application response time by 20% by identifying and fixing backend performance bottlenecks
- Collaborated with cross-functional teams using Git/GitHub for version control, code reviews, and feature branching

EDUCATION

BCA in Cloud Technology and Information Security

Aug 2022 – Aug 2025

P.I.E.T – Panipat Institute of Engineering & Technology, Panipat, Haryana
